

Randoo

Estania Blanc Doblas

My APP

- My app provide user with a button to generate a random restaurant from JSON file.
- User also have to register for app.
- Users have the option to add set restaurants as their favorite.
- The information from the JSON file are the name of the restaurant, the location, the town and also the zip.

Problems

- firebase
 - firebase data
 - firebase gradle error
 - getting the information to firebase
- Bottom Nav
 - At first it was fine then i changed something and now i have errors
-

factors

- Some factors i've included in this app from the course are:
- Google map
- Bottom Nav
- Firebase
- RecyclerView
